EDUCATION

SM SCIENCE COLLEGE, KARACHI

- Intermediate in Computer Science – 2025 – 2027
- Matriculation (Computer Science) – Secured 82.55%

COURSES & TRAINING

GOVERNOR SINDH ARTIFICIAL INTELLIGENCE COURSE

- Frontend Development (React, Next.js)
- Backend Development (Python, FastAPI) (In Progress)
- Spec-Driven & AI-Driven Development
- Agentic AI with Python (OpenAI Agent SDK)

SKILLS

- Building responsive and scalable frontend applications using Next.js, React.js, TypeScript, JavaScript, Tailwind CSS, HTML, and CSS
- Developing backend APIs with Python using FastAPI and working with PostgreSQL databases
- Applying Spec-Driven and AI-Driven Development practices in real projects and hackathons
- Working with Agentic AI systems using Python and the OpenAI Agent SDK
- Strong problem-solving skills with effective communication, teamwork, time management, and adaptability

LANGUAGES

- Urdu
- English

ALI GADIT

FRONT-END DEVELOPER

PROFILE

Frontend Developer specializing in building scalable, responsive, and user-centric web applications using React, Next.js, TypeScript, Tailwind CSS. Experienced in Spec-Driven Development, applying structured engineering practices to deliver reliable and maintainable solutions, including leading and contributing to hackathon-based projects.

Currently pursuing Intermediate in Computer Science and actively advancing in Agentic AI development with Python and the OpenAI Agent SDK through the Governor Sindh Artificial Intelligence Initiative (GIAIC). Founder of Codeverse, focused on building impactful developer-driven products and learning-oriented communities. Passionate about solving real-world problems, shipping high-quality software, and growing within high-performance engineering teams.

EXPERIENCE

Founder & CEO | Codeverse Innovations Remote (Part-time) | November 2025 – Present

Codeverse Portfolio: codeverseinnovations.vercel.app

- Leading a global digital solutions team delivering Modern Web Development (React, Next.js) and Agentic AI systems.
- Overseeing the end-to-end delivery of SaaS MVP development, automation workflows, and UI/UX design.
- Managing product strategy, client operations, and team leadership to drive high-performance digital products for international clients.
- Providing comprehensive digital growth services, including SEO and SMM.

PROJECTS & PRACTICAL EXPERIENCE

Physical AI & Robotics Textbook | Panaversity

HackathonTechnologies: OpenAI Agent SDK, Qdrant, FastAPI, Neon Postgres, Docusaurus

- Spec-Driven Development: Utilized Claude Code and Spec-Kit Plus to architect and deploy an AI-native technical textbook on Docusaurus.
- RAG Chatbot Integration: Engineered a Retrieval-Augmented Generation (RAG) system using the OpenAI Agents SDK and Qdrant Vector Database, enabling the chatbot to answer user queries based strictly on the book's content.
- Serverless Backend: Implemented a scalable backend architecture using FastAPI and Neon Serverless Postgres to handle data processing and AI agent interactions.
- Live Project: ali-gadit.github.io/physical-ai-and-humanoid-robotics-book/

Codeverse Innovations Portfolio | Official Agency

WebsiteTechnologies: Next.js, React.js, TypeScript, Tailwind CSS, OpenAI Agent SDK, FastAPI

- Full-Stack Implementation: Designed and developed the official agency platform using Next.js and Tailwind CSS to showcase digital services.
- Intelligent Agent Integration: Built and embedded a conversational AI Chatbot using the OpenAI Agents SDK, demonstrating the agency's capability in creating autonomous agentic workflows.
- Live Project: codeverseinnovations.vercel.app

Trade-with-Agent | AI Automation Project

- Developing an automated trading system using Agentic AI and Python to analyze financial data.
- Integrating the OpenAI Agent SDK to create intelligent agents capable of autonomous decision-making workflows.
